

TROYBEDINGFIELD

Developer & UX/UI Designer

Passionate Front-End Developer and UX/UI Designer who utilizes both disciplines to create the best experiences and products for the end user.

With over 13 years experience , I:

- Possess a proven ability to meet development, UX, and UI requirements
- Establish Development and Design System best practices and implement them throughout the organization and code base
- Prioritize and direct work among the development team and UX team to achieve milestones and launch products
- Work with senior-level stakeholders to create high-quality digital solutions
- Conduct Figma sessions with the UX and creative teams to create, test, and refine solutions resulting in highly functional prototypes for user testing

EMPLOYMENT HISTORY

Proliant, UX/UI Developer | 2020-2024

- Worked on a component library used by multiple products and teams, built a new main menu UI, replaced and updated old UI libraries, removed old dependencies, updated and removed old style sheets and controls, and rebuilt pages and controls to be responsive across multiple breakpoints down to mobile.
- Built our entire design system in Figma with components, variables, properties, and code snippets from our internal component library and created templates and prototypes for the UX team to easily design pages and patterns that match our code base
- Created an internal style guide web app for developers for reference and to pull code snippets for commonly used controls and components

Meacham Controls Systems, Developer & Designer | 2019-2020

- Created user portals and dashboards for controls systems

Scout, Senior Developer | 2014 - 2019

- Increased efficiency and reduced cost by introducing a modern development workflow which resulted in easier collaboration across the UX, creative, and development disciplines
- Managed and recommended hosting resulting in more efficient workflows and implementation for HIPAA and non HIPAA digital projects
- Managed the development team's allocation by partnering with key internal stakeholders and implemented development best practices across all digital projects
- Managed multiple FTEs and off-site contract resources including third party developers and hosting services, data services, and database architects
- Assisted with new business pitches, RFP and RFI processes
- Led client technical assessments and tech stack audits & research

Blue Sky Agency, Developer & Designer | 2012 - 2014

- Developed and managed multiple client websites

Castalia Communications Corp., Developer & Designer | 2010 - 2012

- Developed and managed multiple client websites
